

TUFTEX®

Corrugated PVC Panels

Tuftex Corrugated PVC Panels can be used as ceiling and wall liners in new construction and for up grading in older buildings. Tuftex is a cost effective alternative to the traditional painted plywood and FRP panels. These panels are non-flammable and corrosion resistant. They provide a high impact strength and are easy to cut and install. Tuftex panels will never rust, rot, chip or peel. The Smooth facage is easy to clean and provide a hygienic and virtually maintenance free interior surface. Panels are available in 12' 2", 16' 4" and 20' 4" lengths.
